

Annual School Technology Survey 2015

Welcome!

The following annual technology questionnaire is being administered to all Vermont schools in order to collect important data about many aspects of the education technology landscape in our schools. The data is used to continue to foster sharing of information with the Vermont Department of Libraries, the broadband mapping projects in the state, and the Governor's office. This year's survey has been greatly reduced in scope to allow for quicker response time and a more comprehensive return from schools. Please take the time to complete this REQUIRED survey.

The Agency of Education is requiring schools to provide the information contained herein to the best of their ability. Responses must be made for each individual school, NOT for the Supervisory Union. Please use the most recent school year as your reference point when responding to questions. For device-related questions, please use the numbers you anticipate for June 30, 2015.
